

TC ID	Test Name	Description	References	Prerequisites	Test Configuration	Test Steps	Expected Results	Priority	Status
TC-LOGI N-001	Login with valid credentials	Verify that the user can log in to OrangeHRM with valid credential	REQ-LOGI N-001, REQ-LOGI N-004	OrangeHRM must be accessible. User must be on the login page. Valid credentials must be available	Browser: Mozilla Firefox; OS: Linux; URL: OrangeHRM login page; Username: Admin; Password: admin123	1. Open OrangeHRM login page. 2. Enter Admin in Username. 3. Enter admin123 in Password. 4. Click Login. 5. Check the displayed page.	The login page opens correctly. The credentials are accepted. The user is redirected to the Dashboard.	High	Positive
TC-LOGI N-002	Login with invalid password	Verify that the system rejects login when the password is incorrect	REQ-LOGI N-002	OrangeHRM must be accessible. User must be on the login page.	Browser: Mozilla Firefox; OS: Linux; Username: Admin; Password: wrong_password	1. Open OrangeHRM login page. 2. Enter Admin in Username. 3. Enter wrong_password in Password. 4. Click Login. 5. Check the error message.	The system rejects the login. An error message is displayed indicating invalid credentials	High	Positive
TC-LOGI N-003	Login with invalid username	Verify that the system rejects login when the username is incorrect	REQ-LOGI N-002	OrangeHRM must be accessible. User must be on the login page.	Browser: Mozilla Firefox; OS: Linux; Username: wrong_user; Password: admin123	1. Open OrangeHRM login page. 2. Enter wrong_user in Username. 3. Enter admin123 in Password. 4. Click Login. 5. Check the error message	The system rejects the login. An error message is displayed indicating invalid credentials.	High	Positive
TC-LOGI N-004	Login with empty fields	Verify that the system prevents login when Username and Password are empty	REQ-LOGI N-003	User must be on the OrangeHRM login page	Browser: Mozilla Firefox; OS: Linux; Username: empty; Password: empty	1. Open OrangeHRM login page. 2. Leave Username empty. 3. Leave Password empty. 4. Click Login. 5. Check the validation messages	The system blocks the login. Required field messages are displayed.	Medium	Positive
TC-LOGI N-005	Login with empty username	Verify that the Username	REQ-LOGI N-003	User must be on the OrangeHRM	Browser: Mozilla Firefox; OS: Linux; Username: empty;	1. Open OrangeHRM login page. 2.	The system blocks the login. A required message	Medium	Positive

		field is required for login		login page	Password: admin123	Leave Username empty. 3. Enter admin123 in Password. 4. Click Login. 5. Check the validation message	is displayed for the Username field.		
TC-LOGI N-006	Login with empty password	Verify that the Password field is required for login	REQ-LOGI N-003	User must be on the OrangeHRM login page	Browser: Mozilla Firefox; OS: Linux; Username: Admin; Password: empty	1. Open OrangeHRM login page. 2. Enter Admin in Username. 3. Leave Password empty. 4. Click Login. 5. Check the validation message	The system blocks the login. A required message is displayed for the Password field.	Medium	Positive
TC-LOGI N-007	Logout after successful login	Verify that a logged-in user can log out successfully	REQ-LOGI N-005	User must be logged in to OrangeHRM.	Browser: Mozilla Firefox; OS: Linux; Logged-in account: Admin	1. Log in with Admin/admin12 3. 2. Click the user menu at the top right. 3. Click Logout. 4. Check the displayed page.	The user menu opens. The user is logged out. The login page is displayed again	Medium	Positive
TC-LOGI N-008	Forgot password link verification	Verify that the Forgot your password link redirects the user to the password reset page	REQ-LOGI N-006	User must be on the OrangeHRM login page.	Browser: Mozilla Firefox; OS: Linux	1. Open OrangeHRM login page. 2. Click Forgot your password. 3. Check the displayed page.	The system redirects the user to the password reset page	Low	Positive

Phase 2 — Test Execution and Bug Reporting

1. Test Execution Summary

Project: OrangeHRM Login Module Testing

Application: OrangeHRM Demo

URL: <https://opensource-demo.orangehrmlive.com/web/index.php/auth/login>

Browser: Mozilla Firefox
Operating System: Linux
Tester: Zaidi Oussama
Execution Type: Manual Testing

BUG Report

Defect ID: BUG-LOGIN-001

Title: Password reset page does not clearly guide the user after clicking “Forgot your password?”, and isn’t a secure method to recover the user pswd”

Related Test Case: TC-LOGIN-008

Module: Login / Password Recovery

Severity: Minor

Priority: Medium

Status: New

Assigned To: Developer / QA Team

Description:

When the user clicks on the “Forgot your password?” link from the OrangeHRM login page, the system redirects the user to the password reset page. However, the page does not provide enough clear guidance to help the user understand the next step, adding to that it is not a secure method because it should verify the real user identity to identify who is trying to get the account recovered.

Steps to Reproduce:

1. Open the OrangeHRM login page.
2. Click on the “Forgot your password?” link.
3. Observe the password reset page.

Expected Result:

The password reset page should clearly explain what the user must do to recover the password, for example by entering the username and submitting the reset request and should also verify his real identity before recovery.

Actual Result:

The page opens, but the guidance is not clear enough for the user.

Environment:

Browser: Mozilla Firefox

Operating System: Linux

Application: OrangeHRM Demo

Recommendation:

Improve the password reset page by adding clearer instructions for the user, such as “Enter your username to receive password reset instructions”, adding 2FA to insure the real user is trying to recover his account
